- Customized HMI

Industrial keyboards

Your competent partner for HMI !

We offer you innovative solutions for touch panel with application specific design with possibility of integration of additional customized operating elements e.g. keys with or without back lighted symbols. Embedded in a high quality and rugged housing made of stainless steel or plastic it is protected against dirtiness, wetness or vandalism.

Further very important parts in our product range are design and assembly of standard and customized full travel keyboards, silicone keyboards and membrane keypads with individual surfaces and coatings.

Membrane & silicone keypads

Customized HMI

Our in-house engineering department grants full service for realisation of your specific data input system.

Manufacturing facility in Germany and our partner Printec - H.T. in Taiwan/China and Zytronic Displays Ltd. in Great Britain guarantee competitiveness and highest flexibility.

Choose now our quality and service and we will attend you from the idea up to the finished product!
